Logic**

## Gain A New Perspective On Your Intelligent Building.

One of the greatest advantages of an intelligent building is the amount of data it produces. Every system, every controller and every device integrated with your automation system provides numerous data points that can help inform decisions leading to greater efficiencies and lower operating costs. But to unlock those benefits, it's essential to have a way to organize and analyze data quickly, so you can develop powerful insights and find new opportunities to optimize your building.

The Abound Predictive Insights solution makes the whole process simple.

- Seamlessly collects and sends building data to the cloud.
- Analyzes operations holistically using the CORTIX™ IoT platform.
- Develops actionable insights into your building's operations.
- Delivers insights to you via advisory reports from our team of experts.

## Start Seeing A Bigger Picture.

Data is only valuable when it can be organized, understood and used to make smart decisions. That's where Automated Logic comes in. The Abound Predictive Insights solution provides a powerful platform that processes building data and provides actionable intelligence you can count on.

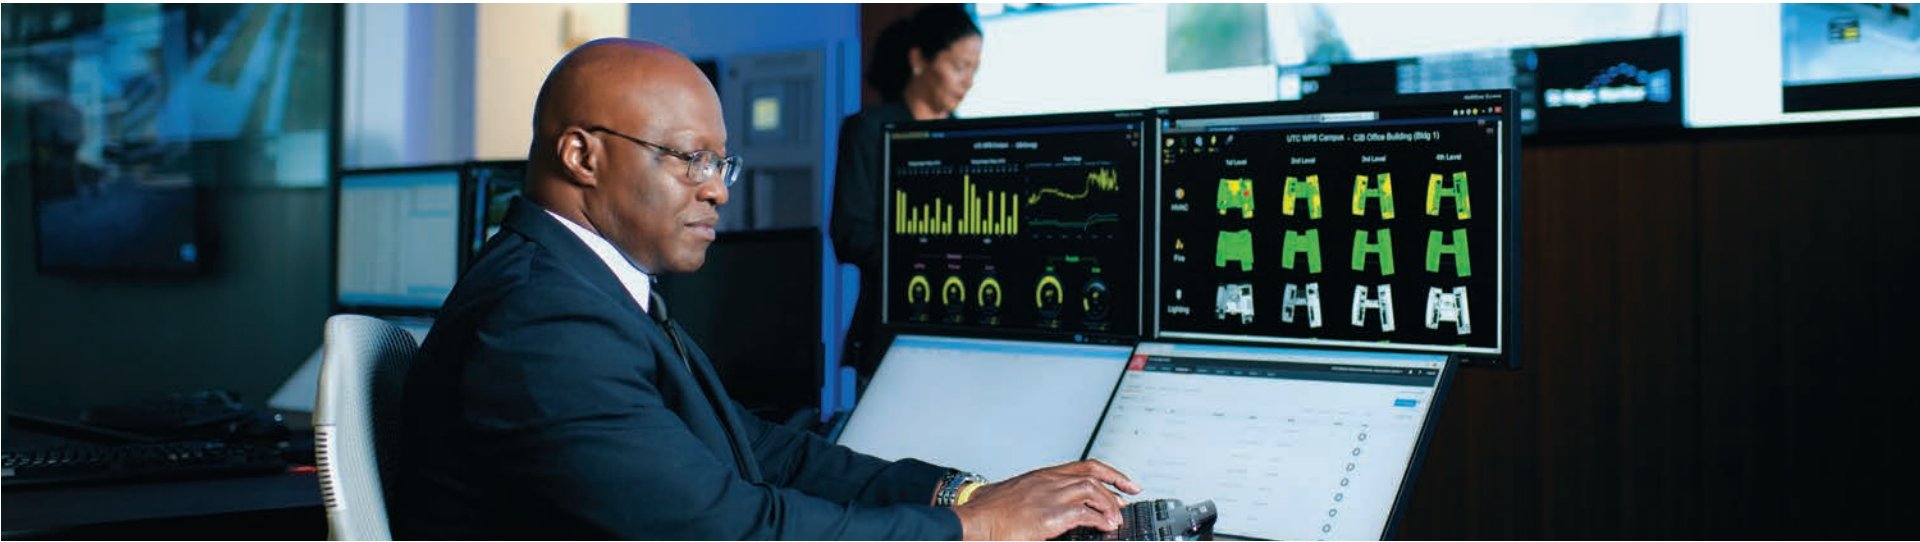

### Predictive Analytics

By using artificial intelligence to compare building conditions to models based on ideal scenarios, the Abound Predictive Insights solution can see deviations in order to predict failures and maintenance issues, and also pinpoint efficiency improvement opportunities.

### Asset Optimization

Find hidden opportunities to improve and optimize equipment with a system designed to dig deeper into building data, find inefficiencies and ensure you're getting the most out of your investments.

## Powered By The Cloud. Enhanced By Expertise.

By combining cloud-based predictive analytics with advisory-based services, the Abound Predictive Insights solution helps our team of experts advise building managers on proactive maintenance strategies that improve the performance of building systems and help extend equipment life spans.

### Advisory Services

Our experienced team of intelligent building experts is standing by to help interpret complex datasets and assist with the implementation of advanced energy reduction and proactive maintenance strategies.

### Proactive Maintenance

Save time and money with active monitoring, alarm management and remote resolution to identify and fix problems and performance issues before they become major complications.

## A Solution Built for the Challenges of Business.

The benefits of cloud-based data analytics go far beyond simply improving occupant comfort and energy efficiency. By protecting assets and helping you manage systems with fewer resources, the Abound Predictive Insights solution provides a range of ways to reduce capital expenditure and provide a positive return on investment.

- Detects opportunities to reduce energy use.
- Monitors the health of assets including HVAC equipment and building automation and controls.
- Ensures reliability of assets with predictive analytics.
- Reduces maintenance by timing it to occur as needed, rather than according to fixed timetables.
- Reduces staff requirements with facility management services and 24/7 prognostics.

## WE MAKE BUILDINGS BETTER.

Automated Logic

The Abound Predictive Insights solution is part of a complete intelligent building ecosystem offered by Automated Logic. When it's integrated with the rest of our product offerings, including our industry-leading WebCTRL® building automation system, you can unlock even greater results through seamless interactions between all of our different solutions.

Improved Energy Efficiency	Enhanced Occupant Comfort
Proactive Maintenance	Reduced Equipment Downtime

EnergyReports™

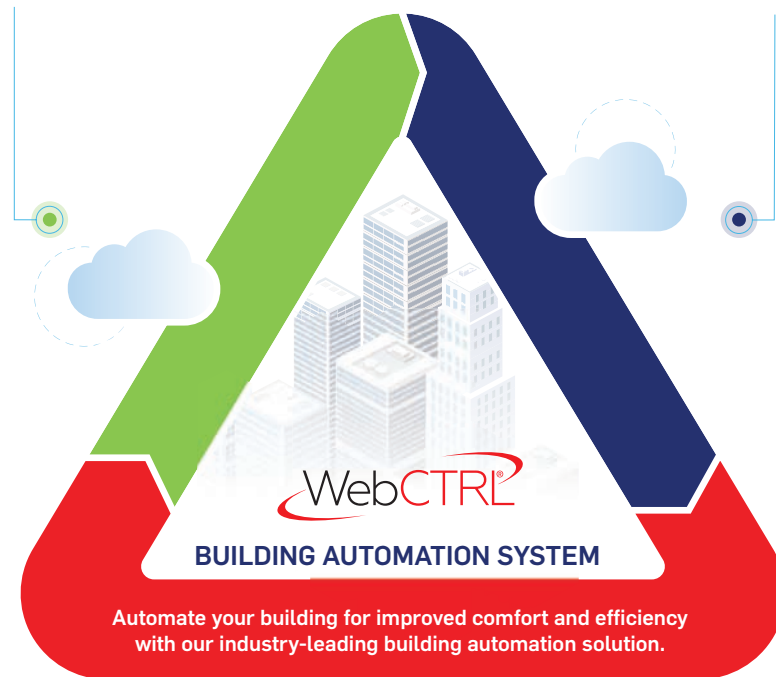

### ENERGY MANAGEMENT PACKAGE

Unlock greater energy efficiency and maintain sustainability with our easy-to-use reporting software.

ABOUND | Predictive Insights

### ANALYTICS SOLUTION

Proactively manage assets, prevent downtime, improve efficiency and reduce costs by combining analytics with outcome-based advisory services.

## See it All For Yourself.

Contact us for more information or to schedule a live demo so you can experience all the benefits of our intelligent building solutions firsthand.
